Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

S68700
HPTP beta-like tyrosine phosphatase precursor - mouse
C;Species: Mus musculus (house mouse)
C;Date: 15-Feb-1997 #sequence_revision 13-Mar-1997 #text_change 20-Jun-2000
C;Accession: S68700
B;Kuramochi, S.; Matsuda, S.; Matsuda, Y.; Saitoh, T.; Ohsugi, M.; Yamamoto, T.
FEBS Lett. 378, 7-14, 1996
A;Title: Molecular cloning and characterization of Byp, a murine receptor-type tyrosi A;Reference number: S68700
A;Reference number: S68700
A;Status: preliminary; nucleic acid sequence not shown
A;Molecule type: mRNA
A;Residues: 1-1238 <KRNA
A;Residues: 1-1238 <KRNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 protein-tyrosine-phosphatase (EC 3.1.3.48), receptor type J precursor - human N;Alternate names: density enhanced phosphatase-1 (DEP-1); protein-tyrosine phosphata (S;Specias: Homo saplens (man) C;Dacles: Homo saplens (man) C;Date: 01-Mar-1996 #sequence_revision 08-Mar-1996 #text_change 22-Jun-1999 C;Accession: 138670; 152599 R;Ostman, A.; Yang, O.; Tonks, N.K.                                                                                                                                                                                                                                                                                                                                                                                                                             probable protein-tyrosine-phosphatase (EC 3.1.3.48) - horn shark
N.Alternate names: CD45 homolog
N.Alternate names: CD45 homolog
N.Alternate names: CD45 homolog
S.Species: Heterodontus francisci (horn shark)
C.Date: 11-Jan-2000 #sequence_revision 11-Jan-2000 #text_change 11-Jan-2000
C.Accession: T43148
R.McMuara, M.; Mattheway, R.J.; Robb, B.; Bork, P.; Thomas, M.L.
Submitted to the EMBL Data Library, August 1995
A.Reference number: Z22317
A.Accession: T43148
A.Status: preliminary; translated from GB/EMBL/DDBJ
A.Molecule type: mRNA
A.Molecule type: mRNA
A.Molecule type: mRNA
A.Residues: 1-1200 < OKD.

DOMAIN
  tyrosine + phosphate.
SUBCELLULAR LOCATION: Type I membrane protein.
ALTERNATIVE PRODUCTS: THERE ARE DIFFERENT VARIANTS OF L-CA, WHICH ARISE BY ALTERNATIVE SPLICTING.
TISSUE SPECIFICITY: VARIANTS 4 AND 3 ARE FOUND IN THE LYMPH NODE, PARIANTS I AND 2 ARE FOUND IN THROCYTE AND LYMPH NODE.
PTH: HEAVILY N- AND O-GICCOSYLATED
PTH: HEAVILY N- AND O-GICCOSYLATED
PTH: THE CYTOPLASMIC DOMAIN CONTAINS POTENTIAL PHOSPHORYLATION

SUBUNIT: THE CARBONIC-ANHYDRASE LIKE DOMAIN BINDS TO CONTACTIN.
SUBCELLULAR LOCATION: Type I membrane protein.
ALTERNATIVE PRODUCTS: A LONG FORM (SHOWN HERE), A SHORT FORM
MISSING AN INTERNAL SEGMENT, AND PHOSPHACAN WHICH REPRESENTS THE
ENTIRE EXTRACELULAR DOMAIN ARE PRODUCED BY ALTERNATIVE SPLICING.
TISSUE SPECIFICITY: NERVOUS TISSUE-SPECIFIC.
SIMILARITY: IN THE N-TERMINAL SECTION; BELONGS TO THE EUKARYOTIC-
TYPE CARBONIC ANHYDRASE FAMILY.
                                                                     Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi;

            DEVELOPMENTAL PLASTICITY.
PTM: THIS PROTEIN UNDERGOES PROTEOLYTIC PROCESSING.
SIMILARITY: CONTAINS 1 MAM DOMAIN.
SIMILARITY: CONTAINS 1 MAMUNGLOBULIN-LIKE C2-TYPE DOMAIN.
SIMILARITY: CONTAINS 4 FIBRONECTIN TYPE III-LIKE DOMAINS.
SIMILARITY: CONTAINS 2 PROTEIN-TYROSINE PHOSPHATASE DOMAINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                PROTEIN-TYROSINE PHOSPHATASE KAPPA.
